Durable & Dependable Screen Printing Machinery

# KEY FEATURES

Our patented FlashBack is the most versatile system in the industry and can easily adapt to your shop's individual needs. Add it to our Cutlass or Sabre\* presses to print, flash and cool at any or all stations without losing a color!

*\*Not available on 12-color Sabre*

## E-CHAIN FOLLOWER

Safely routes all wiring and power connections away from any heat generated by the quartz bulbs, while also providing a much smoother travel for the element tray over the garment.

## CONTROL BOX

A DB-9 cable and jack system have been added to each unit allowing multiple units to be effortlessly interconnected — easily creating a daisy chain of flash units to be used on the same press.

## ADJUSTABLE CASTERS

Easier to position and align the flash, providing a quick and easy way to level the flash to the platen without tools. There is also a brake on all casters to keep the flash from moving during operation.

## SABRE FLASHBACK

Part Number	SFB-2020
Head Size	20" x 20" (51cm x 51cm)
Power Requirements	ELECTRIC 1-Phase, 220V, 50-60Hz, 4400 Watts, 20amps
