Durable & Dependable Screen Printing Machinery

# KEY FEATURES

## EXTENDED CENTER SHAFT

The shaft is now twice as long and supported at the bottom. This provides over five times the strength as before and creates additional support to all portions of the press.

## HONEYCOMB TURRET DESIGN

This re-designed turret provides an easier to use carousel with improved structural support.

## PRINT ARM CRADLE BRACKET

This strengthened arm support system utilizes a flat plate, four point flush, mounted connection — providing a stronger, more stable print arm with minimal pallet deflection.

## COVERED SPRING CARTRIDGE

Compression springs provide a longer life span and are available with multiple tension settings from the factory. Covering them below the print head also provides a more secure setting.

## PRINT HEAD WITH MICRO REGISTRATION

Spring loaded micro registration system with easy to adjust handles and knobs. Has minimal to no backlash when in use allowing for the smallest of on head adjustments.

*\*Not included on 01100B*

## QUICK RELEASE RUBBER COATED ALUMINUM PALLETS

Floor model presses come standard with a quick release pallet and bracket system. Each press will also include a set of rubber coated aluminum pallets. This allows for quick change overs and pallet compatibility with other presses.

## CAPTURE FORK & BEARING REGISTRATION

This system is derived from the same time-tested registration used on all of our automatic presses. It provides little to no wear and with no adjustments needed; this offers a lifetime of use with no fuss.
